Pseudocode and Algorithm: Exams Eligibility Checker

Algorithm

1. Start the program (Main).
2. Declare the variables: studentName (String), percentage (Real), choice (String), totalSchoolDays (Integer) and totalDaysPresent (Integer).
3. Set choice to "yes".
4. Display "Welcome to our exams eligibility checker".
5. Check whether choice is equal to "yes". If True, go to step 6. If False, go to step 19.
6. Display "Please enter the name of the student".
7. Read studentName.
8. Display "Please enter total school days".
9. Read totalSchoolDays.
10. Display "Please enter total days present".
11. Read totalDaysPresent.
12. Calculate percentage = totalDaysPresent / totalSchoolDays * 100.
13. Check whether percentage is greater than or equal to 75. If True, go to step 14. If False, go to step 15.
14. Display "Based on the attendance record, " & studentName & " is eligible for the exams", then go to step 16.
15. Display "Based on the attendance record, " & studentName & " is not eligible for this exams", then go to step 16.
16. Display "Do you want to check another student? Enter yes or no".
17. Read choice.
18. Go back to step 5.
19. End the program.

Pseudocode

```
START Main
    DECLARE studentName AS String
    DECLARE percentage AS Real
    DECLARE choice AS String
    DECLARE totalSchoolDays AS Integer
    DECLARE totalDaysPresent AS Integer
```

```
    SET choice = "yes"
    OUTPUT "Welcome to our exams eligibility checker"
    WHILE choice == "yes" DO
        OUTPUT "Please enter the name of the student"
        INPUT studentName
        OUTPUT "Please enter total school days"
        INPUT totalSchoolDays
        OUTPUT "Please enter total days present"
        INPUT totalDaysPresent
        SET percentage = totalDaysPresent / totalSchoolDays * 100
        IF percentage >= 75 THEN
            OUTPUT "Based on the attendance record, " & studentName & " is eligible
for the exams"
        ELSE
            OUTPUT "Based on the attendance record, " & studentName & " is not
eligible for this exams"
        END IF
        OUTPUT "Do you want to check another student? Enter yes or no"
        INPUT choice
    END WHILE
END Main
```
